

# IMPROVING EFFICIENCY, RESPONSIVENESS & PATIENT CARE WITH RFID LOCATION-BASED PATIENT TRACKING

With the installation of a fully automated RFID system, tracking the time in/out of each area in an OR, a hospital has real-time visibility into patient movements, as well as valuable utilization data to optimize workflow.

**100% ACCURACY RATE** notifying staff of events

**15.7%** Lowered costs

Correctly identify medical staff, patient ID, and all other relevant data **100% OF THE TIME**

The availability of actual utilization data increases visibility into utilization statistics **BY 100%**
